

**REMARKS**

Claims 1-16, 18-20, 41-56, and 58-60 are allowed. The foregoing Amendment seeks to correct minor, obvious errors, some of which were inadvertently introduced in Applicants' previous amendment. In particular, claims 1, 14, 18, 41, 54, and 58 are sought to be amended such that the representation of the letter "j" (in subscript in the formulae) appears in regular case in the claim text. It is believed that entry of this amendment will provide claim text that will be more legible in the printed patent. Further, in claims 9, 10, 49, and 50, commas are sought to be added after each listed compound. Again, this correction will provide additional clarity, but only corrects a minor typographical omission.

No new matter will be added, and no new issues will be raised by the Amendment. Accordingly, Applicants request that the claims be amended as indicated prior to issuance. The Examiner is invited to contact the undersigned at (336) 721-3681 regarding any questions concerning the proposed Amendment.

Respectfully submitted,

Date: May 31, 2005
